2. Qualitative Disclosures

<p>A summary of the analysis and conclusions the firm draws from its detailed monitoring of the quality of execution obtained on the execution venues where it executed all client orders in the previous year</p>	<p>Traded volumes are low and traded sizes are relatively low such that execution is within available liquidity and straightforward. Consequently, trading activity does not require the same level of management of slippage and best execution practices that other strategies might require. Nevertheless, periodically, prices are compared across brokers to check and confirm that best execution is being achieved.</p>
<p>An explanation of the relative importance the firm gave to the execution factors of price, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution</p>	<p>Achievement of best execution is key in the Firm’s commitment to act in the best interests of its clients. Consideration is given to “execution factors”: price/costs, speed of execution through to settlement, responsiveness/service, traded size, and any other consideration relevant to the execution of an order. The relative importance of the execution factors is judged on an order-by-order basis in line with the Firm’s experience and prevailing market conditions.</p>
<p>A description of any close links, conflicts of interests, and common ownerships with respect to any execution venues used to execute orders</p>	<p>The Firm does not have any close links, conflicts of interests or common ownerships with respect to the execution venues it uses to execute orders.</p>

<p>A description of any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received</p>	<p>The Firm has not had any arrangements with its execution venues regarding payments made or received, discounts or non-monetary benefits that would compromise its ability to meet its obligations in regard to best execution, conflicts of interest or inducements. The Firm has determined that it will pay for all research itself.</p>
<p>An explanation of the factors that led to a change in the list of execution venues listed in the firm's execution policy, if such a change occurred</p>	<p>During the period under review, the Firm's list of execution venues did not change. The Firm regularly reviews the effectiveness of its Best Execution policy and its execution arrangements to identify and, where appropriate, incorporate any changes to enhance the quality of execution obtained.</p>

Important Information

This document has been prepared for qualified investors only. It is provided for the recipient only and may be provided to others only with prior written permission.

This document may contain certain information regarding the Perspective Investments Unconstrained Strategy (the "Strategy") offered by Perspective Investments. The Strategy is available to qualified investors only, and subject to the discretion of Perspective Investments. Investor qualification criteria depend on the jurisdiction of the potential investor. Even then, satisfaction of investor qualification criteria does not guarantee that further information will be made available or that an investment will be accepted. Please note that Perspective Investments is not offering the Strategy to US Investors currently, although Perspective Investments may do so in the future.

Accordingly, this document is being provided for information and discussion purposes only, and is not intended to be, nor should it be construed or used as investment, tax or legal advice, nor does it represent a solicitation to invest. Recipients should therefore consider carefully whether an investment in the Strategy is appropriate for them in light of their financial situation.

Before making any investment in any investment strategy, recipients should consult with professional advisor(s) to determine whether such an investment is suitable for them in light of their investment objectives and financial situation.

This document has been prepared based on Perspective Investments research and analysis and represents our views and opinions. Unless otherwise indicated, the source of all data is Perspective Investments, although third-party data may have been obtained and is based on sources reasonably believed to be reliable. Perspective Investments does not guarantee the accuracy of the information, which may be incomplete or condensed. Any reference to individual investments is purely for the purpose of illustration and should not be construed as a recommendation to buy or sell or advice in relation to investment, legal or tax matters. Opinions expressed in this document are Perspective Investments' opinions at the time of issuance, only, reflecting prevailing market conditions and certain assumptions (which may not prove to be valid), and are subject to change. The information and opinions contained in this document are for background purposes only, and do not purport to be complete or full. Neither the investment manager nor Perspective Investments give any representation, warranty or undertaking as to, or accepts any liability for the accuracy or completeness of the information or opinions contained in this document.

Unconstrained strategies, relative to more conventional investment strategies, may take more risk. Conventional strategies of investment in securities and derivatives and more speculative trading involve substantial risk of loss and are not appropriate for all investors. Unconstrained Strategy enables investment in anything, with no benchmark and no targets in relation to geographic, industrial, or other market sectors or specific asset classes, and subject to very few investment restrictions and may make extensive use of derivative instruments which are inherently leveraged with substantial risk of loss. General investment risks include the temporary or permanent loss of capital due to short-term volatility or more permanent movements in the value of investments relative to the views of and positions taken by the Investment Manager.

Such losses can arise in several ways including market movements (in bonds, commodities, currencies, equities, etc.), credit & counterparty defaults (including broker failures), uninsured losses, and valuation inaccuracies. General risks include external risks beyond the control of the Firm such as environmental risks like climate change and political risk. Specific investment risks that may be taken include (but are not limited to): Credit & Counterparty Risks; Concentration Risks; Leverage Risks; Complexity Risks; Private & Illiquid Investment Risks; Short Position Risks; Hedging Risks; and Pooled Vehicle Risks. Investment in illiquid investments which are longer-term and may be difficult to dispose of is reflected in investor liquidity terms, such that investors must be prepared to wait to get their money back.

Past performance is no guarantee of future results. The value of investments may go down as well as up and investors may not get back their original investment. Where performance of the Strategy is shown, this is calculated from gross returns since inception, linking audited product vehicle returns ("Product Results") from 1 January 2009 to the present with unaudited founder family account composite returns ("Proprietary Results") from 1 January 2004 through 31 December 2008. Both the Product Results and the Proprietary Results have been adjusted for currency conversion and to account for administration expenses and investment management fees. These returns may be amended due to re-pricing adjustments or receipt of more accurate data, among other things, which will be reflected in the next factsheets. No representation is being made that any investor will or is likely to achieve similar trading results included in this document.
